## WORK EXPERIENCE

### Backend Developer Smartsheet

05/2021 - 03/2022

Washington, USA

A platform for work management and automation, helping teams collaborate on projects and tasks.

Achievements,

- Developed back-end service for multiplayer games with video calling capability between players
- Reconfigured the Socket.IO connection so that the server still recognizes registered clients, even after a server crash
- Integrated a Cloud Firestore database with an existing codebase

### Full Stack Developer InnoVantage

03/2022 - 07/2024

Makati, Philippines

Provides IT services and solutions, including software development and business process outsourcing.

Achievements/Tasks

- Started building features and fixing bugs in an existing codebase from the first day after knowledge transfer
- Created a library that abstracts away the complexities of end-to-end tests and started integrating end-to-end tests into the project
- Developed new React hooks to reduce the amount of duplicated code in the codebase

### Frontend Developer WebGeek

05/2020 - 05/2021

Quezon, Philippines

Focuses on web development, mobile app development, and digital marketing solutions.

Achievements/Tasks

- Scraped production-level websites to replicate them locally and performed updates on them.
- Implemented CSS changes on the fly, using the browser only where code was not convenient for use.
- Adapted styles to a variety of screen sizes and different browser environments.
