

Tomas Rodriguez

Introduction

Result-Driven Senior Blockchain Developer with 6 years of proven track record in developing 20+ secure, user-engaging blockchain solutions. Skilled in dApp development, smart contracts, and optimization algorithms. Committed to continuous learning and driving innovation through effective teamwork and communication.

Work History

3Line Tax - Senior Blockchain Developer

Location: Riga, Latvia

07/2023 - 06/2024

- Built a blockchain-based identity verification system that significantly improved security measures and reduced fraud by 60%, ensured the integrity and privacy of user data and platform.
- Managed the successful integration of smart contracts for a decentralized voting system, boosted voter participation by 40%.
- Streamlined the development process by implementing new testing tools and methodologies, which resulted in a substantial 24% reduction in deployment time across various projects.
- Created different kinds of 230+ smart contracts, like reflection tokens, farming contracts, staking contracts, lottery game contracts, etc on a number of networks that support solidity

Staxe - Blockchain Developer

Location: Dublin, Ireland

02/2022 - 05/2023

- Built a DApp for high-level in transparency and traceability, resulting in a 30% reduction in operational costs.
- Optimized and refined the smart contract processes that underpinned the platform's core functionality, enhancing transaction speed by an impressive 33% and providing users with a significantly smoother and more efficient experience.
- Developed a user-friendly interface that Growing user engagement by 25%, making it easier for clients to interact with the platform.
- Spearheaded the fixing and debugging of 15+ non-fungible token marketplaces onto the Doge Chain blockchain network

Equalizer Finance - Junior Blockchain Developer

Location: Luxembourg, Luxembourg

05/2019 - 10/2022

- Assisted in the development of DeFi that increased participants by 22%, attracting over 3850 active users within the first month.
- Collaborated with senior developers to implement smart contracts, ensuring secure transactions with a 99% success rate.
- Documented coding standards and guidelines for team consistency, reducing errors by 15% across 28+ projects.
- Successfully integrated 4+ Uniswap decentralized exchanges using a comprehensive technology stack that included Solidity, React.js, Tailwind CSS, Web3.js, Node.js, and MySQL.

Location: Sofia, Sofia 1632

Skills

❖ Hard Skills

- Smart Contract
- DLT
- Cryptographic Hashing
- ECDSA
- Consensus Mechanisms
- DApp
- Web3
- API Integration,
- C++, Python, JS, Solidity, Rust

❖ Soft Skills

- Active Team Collaboration
 - Professional Demeanor
 - Effective Communication
 - Continuous Learning
 - Self Motivation
-

Education

Technical University of Sofia

Sofia, Bulgaria

09/2014 - 06/2018

Bachelor of Science: Computer Science

- Completed AP course in Data Structures and Algorithms, Software Engineering, Database Management Systems
 - Completed Machine-Learning course in EdX
 - Participated in 6-month internship at Caosh AD, developing ray tracing software.
-
